

Maximum hygiene and safety with "Touch Free" Hydrazon and BluSoda

 TOUCH
FREE

Cool, yes we are.

Hygiene comes in threes!

Touch Free, Nano Silver Protection and Nano Silver Pipe, to ensure maximum safety and hygiene.

3 innovative systems that ensure our machines and your water are free from any potential contamination. Never before have we focused so strongly on the objective of reducing the proliferation of bacteria and viruses by 99.9%, to guarantee the safety of all users.

To dispense, just position your finger 1.5 cm away from the panel and keep it there until the dispensing is complete. Removing your finger will cause the dispensing operation to be interrupted automatically.

The Touch Free system utilizes two different technologies: the BluSoda models use infra-red, whereas the controls on the Hydrazon models are activated thanks to capacitive proximity.

NANO SILVER PROTECTION

The external surface is treated with Nano Silver Protection technology, which uses silver ions, and is capable of reducing bacterial proliferation by 99.9% in 24 hours.

Stainless steel tube AISI 316L with an innovative nanotechnology-based SILVER ion treatment on the surface. Silver is naturally bacterio-static and so reduces bacterial growth in the pipe. The surface treated with these nano particles is much more compact and smooth: this prevents the formation of deposits, biofilm or bacterial colonies and because the water flows better through the tube, also reduces dripping at the end of dispensing.

BLUSODA

TOUCH FREE

Compact, powerful, beautifully designed and now more versatile and safer than ever, thanks to Touch Free technology. The water you want, without even touching the controls!

Compact, powerful and built entirely in stainless steel, Blusoda is the Blupura watercooler perfect for domestic and office use, with professional performance. BluSoda Touch Free is available with three different dispensing options: cold still water, cold sparkling water and room-temperature water.

Optional extras:

- As an alternative to the Nano Silver Pipe, it is possible to use UV at the outlet.

- BluSoda Cabinet can be combined with the 5-liter tank, with refill alarm.

HYDRAZON

TOUCH FREE

Hydrazon's design and performance meet Touch Free technology: a convenient source of great water, to boost wellbeing and achieve total hygiene.

Essential and elegant, feeling at home in every type of environment. Intelligent in its design, to offer the required internal space for the desired filtration. Efficient in its performance and simple in its functionality, to dispense 3 different types of water. HYDRAZON is the perfect solution for any office or workplace.

Drip tray full alert

Optional extras:

- As an alternative to the Nano Silver Pipe, it is possible to use UV at the outlet.

- Integrated cup dispenser.
- Extra space for CO₂ cylinder from 4 to 6 kg.

Accessories

BluSoda Cabinet

Built entirely in stainless steel, with a wider base so as to increase stability and with an inner bracket for mounting filters and the CO₂ cylinder.

Optional extra:
5 Lt. tank with container full alarm.

BluSoda Cup Rest

The innovative drip tray which adapts to the height of the glass - bringing it closer to the point of delivery - avoids unwanted splashes. A drip tray with direct waste discharge is available upon request.

Sanitizing products

Sanitizing and cleaning products.

UV filtration in line (12W)

In line UV light.

CO₂ Cylinder

- Rechargeable 4 Kg.
- Rechargeable 0,640 Kg.
- Disposable 0,6 Kg.

Active carbon filters

Purifies the water making it crystal-clear, removing odour and taste impurities. It totally eradicates any impurity with a size of 0.5 microns, eliminates all odours and unwanted tastes such as chlorine, asbestos fibres and number of microorganisms including crypto-sporidium

- Everpure 4C (capacity 11.000lt.).
- Everpure AC (capacity 2.800lt.).

UVC lamp at the dispense point (4W)

A UV light at the end of every tap. As demonstrated by numerous studies, UV light acts as a strong steriliser therefore preventing the growth of bacteria.

Pressure reducers

CO₂ pressure reducer for refillable or single-use cylinder, water block, water pressure reducer.
